

Tyco 601F-M Marine Conventional Flame Detector

Part No.: 516.600.007

Tyco 601F-M Marine Conventional Solar Blind Infra-Red Flame Detector 516.600.007

The Tyco 601F-M is a conventional type flame detector, designed and approved for use in Marine applications. 601F-M forms part of the 600 series of conventional detectors.

The 601F-M flame detector, by virtue of its operating wavelength and flicker discrimination, is insensitive to normal environmental influences. For outdoor use, a solar blind detector (e.g. the Tyco FlameVision FV411F) should be used.

Mounting base are sold separately

Features

- ✓ Approved by all major classification societies for use on vessels
- ✓ Superior performance and reliability
- ✓ Full feature Solar Blind for false alarm free operation
- ✓ Fast response to flames
- ✓ Detect a 0.1m² fire at a range of 20m
- ✓ Automatic health check feature
- ✓ Discrete ultra-low profile design
- ✓ Fits a standard MZX detector base or functional base
- ✓ Integral alarm LED with 360° angle of view
- ✓ Use T110 infrared test source (With separate adapter)
- ✓ Product Code: 601F-M (516.600.007) Marine Approval
