SAILING BOAT PB303

GENERAL DESCRIPTION

Type	Sailing
Hull	Monohull
Hull Materials	Composites

DIMENSIONS

Length Overall	9.00 m
Beam Maximum	2.96 m
Depth	1.48 m
Draft	~0.40 m
Displacement	~3.5 t
Sail area	~30.00m²

LOAD CAPACITY

People	6 P
--------	-----

PERFORMANCE

Speed (Power)	10 kn
Speed (No Power)	6 kn

PROPULSION

Engines	Diesel (TBA)
Power	1x22 Hp

Avant-garde ship design, classic boat, reasonable and practical layout, simple and comfortable decoration, beautiful and generous, smooth lines, fast . The driving area is equipped with open seating and horizontal platform for outdoor entertainment activities. The cabin is spacious with a kitchen, bathroom and bedroom, good light, providing more service while entertaining.

In the hull and the sandwich layer, the most advanced vacuum assisted resin injection molding technology of high-performance composite material ship in the world will be adopted, which can greatly reduce the weight of the whole ship, increase the strength and toughness, and improve the life of the ship.

The hull is longitudinal skeleton type, single deck sailing boat, easy to operate, safe and comfortable, wide use area, excellent performance, is a very high cost performance multi-purpose sailing. This boat is mainly used for recreation, but also can be used as a sports sailing boat, under the wind conditions, speed up to 10kn.

The boat has been exported to Australia and won the relevant award.
