

Calibration Gas/Marine Span Gas

CALGAZ 2AL SPAN GAS - 4 GAS MIX

1 Product Overview

Marine span gas, also known as calibration gas or calibration span gas, is a specialized type of gas mixture used to calibrate and verify the accuracy of gas detection and measurement instruments in marine environments. These instruments are critical for ensuring the safety of personnel, equipment, and the environment on ships, offshore platforms, and other maritime facilities.

2 Key Features

The CALGAZ 2AL SPAN GAS is 4-MIX 100 CO 15 H2S 2.5% CH4 18% O2. The span gas is widely used for calibration of portable gas detectors.

3 Applications & Certifications

ISO Certification
ensures quality production of span gas. ISO 9001 and ISO 17025 are important.

IMO Guidelines
ensure suitable calibration gas for maritime safety.

Dangerous Chemicals Business License
Handling calibration gases, may require permits due to hazards and pressure.

4 Product Specifications/Performance Data

Technical Specification:

Cylinder	34 liters
Lifetime	24 months

Mixture 4-MIX 100 CO 15 H2S 2.5% CH4 18% O2.	
Carbon Monoxide (CO)	100 ppm
Hydrogen Sulphide (H2S)	15 ppm
Methane (CH4)	2.5% (50%LEL)
Oxygen (O2)	18%
Balance	Nitrogen (N2)
