

## Insertion Flow Sensor for Compressed Air and Gases DN50-DN700 (2"-28")

**Part No.:EE776**

### Technical Specification

|                        |                                                                         |
|------------------------|-------------------------------------------------------------------------|
| <b>Pipe diameter</b>   | <b>DN50 up to DN700 (2"-28")</b>                                        |
| <b>Measuring range</b> | <b>0.5-200 m/s (100...39370 SFPM)</b>                                   |
| <b>Pressure range</b>  | <b>up to 16 bar (232 psi)</b>                                           |
| <b>Protection</b>      | <b>with patented non-return protection</b>                              |
| <b>Output</b>          | <b>0-10 V / 0-20 mA / 4-20 mA / Pulse / Switch / Modbus RTU / M-Bus</b> |
