

BONE/THROAT CONDUCT HEADSET - ZXF-HM1000

Part No.: WR353012

The bone/throat conduct headset ZXF-HM1000 is designed for improving the communication quality between fire fighters. In practice, it is difficult for a firefighter to communicate clearly through a hand-held radio when wearing breathing mask. Therefore, the built-in bone/throat conduct headset solves the problem and contribute clear communication between firefighter. The built-in bone/throat conduct headset can connect with various types of fire fighter's ex-proof radio and free fire fighter's hands.
