

BREATHING AIR COMPRESSOR MINI100

Part No.: WR372011

The MINI 100 breathing air compressor is compact structure and humanized handle design for easy extract. Stainless steel cooler and air-cooled intercooler to maximize the body heat. Equipped with oil level mirror to facilitate constant monitoring of crankcase oil level

Air output in accordance with DIN EN 12021 breathing air standards.

The combination of the proven four stage pumping and three phase electrical motor makes this an extremely reliable breathing air compressor.

Technical specification

Filling rate	100l/min
Filling pressure	330bar
Filling connection	G 5/8"
Motor power	3kw
Power source	440V/60Hz or 380V/50Hz, 3 phases (to be specified, 220V 1 phase is optional)
