

MEDICAL OXYGEN DEVICE WITH 40L CYLINDER

For ships loading dangerous goods and complying with IMO IMDG (International Maritime Dangerous Goods Code) and MFAG (Medical First Aid Guide), appropriate medical oxygen equipment is required on board if casualties cannot be hospitalized on shore within 24 hours.

The equipment shall include one set of 40L medical oxygen cylinder unit with one 40L medical oxygen cylinder and one set of manual resuscitator unit with two 2L oxygen cylinders (one 2L cylinder is as spare).

Technical specification

Volume of oxygen cylinder: 40L

Pressure of oxygen cylinder: 150bar/200bar

Flow rate of flowmeter: 0~50L/min

Supply Scope

| Item | Name | Unit | Qty | Part No. |
|------|---------------------------------------|------|-----|----------|
| 1 | 40L Medical oxygen cylinder with rack | PCS | 1 | WR461031 |
| 2 | Pressure reduce valve | SET | 1 | WR461032 |
| 3 | Wall mounted unit (two ports) | PCS | 1 | WR461033 |
| 4 | Flow meter | PCS | 1 | WR461034 |
| 5 | Humidifying bottle | PCS | 1 | WR461035 |
| 6 | Face mask | PCS | 2 | WR461036 |
| 7 | Mount rail | PCS | 1 | WR461037 |
| 8 | Oxygen nameplate | PCS | 1 | WR461038 |
